

Reinforce Your House Against Earthquakes

Inquiries: Building Safety Division ☎ 054-221-1124

The city provides **seismic assessments** and subsidizes the cost of necessary **reinforcement work** to wooden houses built on or before 31 May 1981.

Seismic Reinforcement Support System

Seismic Assessments (to be discontinued after FY2024)

A “Shizuoka Prefectural Seismic Assessment Consultant” will be dispatched to assess the earthquake resistance of your house free of charge. Please apply to the Building Safety Division (5th floor, City Hall Shizuoka Office) by phone or in person.

Reinforcement Work for Wooden Houses (to be discontinued after FY2025)

An architect will conduct a detailed seismic assessment of your home and draw up a “reinforcement” plan to suit your needs and lifestyle. The reinforcement work will then be carried out based on this plan.

Subsidy amount: 80% of the combined cost of the reinforcement plan and reinforcement work, up to 1 million JPY.

There are various other subsidy systems available. Inquire for more details:

- Subsidy system for seismic reinforcement of concrete block walls
- Seismic assessment program for non-wood homes
- Earthquake shelter improvement program
- Program promoting the securing of furniture.
