

Figure 1: A schematic diagram of a water distribution network. It shows a central vertical pipe labeled '蘇州河' (Suzhou River) with a flow rate of 'Q=1.25,000'. This pipe branches into two horizontal pipes, each labeled '清水区' (Clear Water Zone) with a flow rate of 'Q=1.25,000'. The area between the two horizontal pipes is labeled '蘇州河' and has a value 'S=1.50,000'.
